

Information Security Assignment

Security Analysis With Hexstrike

Your Task:

You are required to perform a security assessment using an offensive AI tool such as hexstrike-ai against the web-DVWA environment. This involves setting up the DVWA Docker container in an isolated offline environment and evaluating it with hexstrike-ai across all configured security levels(low, intermediate and high). After completing the assessment, generate comprehensive report findings.”

DVWA: <https://hub.docker.com/r/vulnerables/web-dvwa>

Hexstrike-ai: <https://github.com/0x4m4/hexstrike-ai>

To Submit:

Report Generated With Hexstrike-AI

.py files (all)

Note:

You may use AI tools (LLMs) to complete this task.

Plagiarism will be checked for this assignment's submission , and will result in a **0** if any cases are caught.
